Re: AXYS Metocean Project, Humboldt, Northern California

Dear Mr. Reilly,

On behalf of the California Fishermen's Resiliency Association and its California Fishermen's Association members, please accept our thanks for your company's consideration of West Coast fishermen's concerns over OSW fishing ground impacts and your willingness to remove the mooring system for the planned metocean data buoy at the end of your project. We are appreciative of the AXYS collaboration with RWE Renewables, a Humboldt area OSW leaseholder.

If you were to find it of service to your project, the CFRA team would welcome the opportunity to better publicize the details and location of your project(s) by outreach with local fishermen.

Please let us know how we might best contribute to the long term success of your ocean data collection project.

Sincerely,

Jake Mitchell, President

Ken Bates, Executive Director
